

*Appendix 7: Consultant Reflection Survey Instrument**

- 1.) What teaching challenge was your team trying to address?
- 2.) What technology solution did your team decide on for this project? What were the decision points that led your team to select this solution over other options?
- 3.) What were the technology challenges you had to address?
- 4.) How did your project team 'roll-out' the technology tool to the students? (i.e. Software Trainers for Students, local support staff, consultant or instructor demo, etc.)
- 5.) Were there any specific successes or challenges that had an impact on the project?
- 6.) What insights or takeaways have you gained from this project? (i.e. best practices, advice for future projects, etc.)
- 7.) Any additional nuggets worth capturing:

*Due to the small number of consultants involved in this award and the unique nature of some of the projects, the data from the consultant reflections will not be shared here. We are in the process of creating a document summarizing methods of good practice for consulting that have resulted from this award. The consultant methods of good practice document will be posted on the Engage website.
